

Looking for a great career?

There are more than 1,000 registered apprenticeship occupations today in construction, advanced manufacturing, agriculture, health care, information technology, transportation and utilities. Employers in these industries need workers who are highly skilled to remain competitive and may be looking to invest in someone like you.

What is apprenticeship?

Apprenticeship is a time-tested, employment-based training system that combines job-related technical instruction with structured on-the-job learning for workers. Apprentices like this approach because they are employed on day one and earn a wage that increases as they attain more skills. At the end of the apprenticeship, the worker earns a nationally recognized credential. Employers like the apprenticeship training model because it is a great way to recruit, train and retain their own workforce.

Is apprenticeship right for me?

Contact us! Apprenticeship Minnesota staff members are available to discuss your interest and may be able to connect you with existing apprenticeship programs and employers.
