

Minnesota Dual-Training Pipeline

Competency Model for Agriculture

Occupation: Farm Animal Manager

Based on: Competency Model Employment and Training Administration, United States Department of Labor.

* Pipeline recommends the Industry-Sector Technical Competencies as formal training opportunities (provided through related instruction) and the Occupation-Specific Competencies as on-the-job training opportunities.

Competency Model for Farm Animal Manager

Farm Animal Manager – A Farm Animal Manager is one who leads a team in the processes of caring for and administering processes to ensure sound production of baby farm animals to adult farm animals to assure optimum productivity. Farm animal managers are often responsible for all aspects of animal care, facility repair and maintenance at the site.

Industry-Sector Technical Competencies

Related Instruction for dual training means the organized and systematic form of education resulting in the enhancement of skills and competencies related to the dual trainee's current or intended occupation.

- **Record keeping** – Knowledge of record keeping procedures regarding production, economics, and farm animal issue troubleshooting.
- **Employee management/training** – Understand employee management principles and training techniques.
- **Animal genetics** – Training on animal genetics and how to manipulate breeding to create improved herds.
