

## (5) Epidural injections:

- (a) time for treatment response, within ~~one~~ two weeks;
- (b) maximum treatment frequency, once every two weeks ~~if a positive response to the first injection~~. If subsequent injections at any one site demonstrate diminishing control of symptoms or fail to facilitate objective ~~functional gains~~ functionality, then injections should be discontinued at that site. ~~Only one injection is reimbursable~~ No more than two levels may be injected per patient visit; and
- (c) maximum treatment, ~~three~~ four injections visits, in a 12-month period. Each visit may include injections at one or two levels.
